Our Panel Locks

Panel Lock Hooks (Male)

Our “Best in the Industry” panel lock simplifies exhibit assembly for reduced set up costs. These latch assemblies are high quality all steel construction, made to stand up to repeated usage and can be used in all types of joints. There are no known failures of these locks while in use. They are used for backwall panels, headers, staging sections, platforms, and specifically designed for the display industry for strong quick connections. Panel lock hook (male) is used in conjunction with the panel lock strike (female).

A panel lock wrench is used to rotate the cam to engage the lock. As the cam is rotated the hook moves out and downward until it engages the strike pin. As the cam is further rotated it draws the hook back pulling the panels together with a high level of pressure. Because the hook and strike are mounted on the opposing faces of the panel stiles they are drawing against the stile material and not relying on the strength of the screws to hold the locks in place. This mounting method eliminates the potential for failure experienced with other styles of panel locks.

Panel Lock Strikes (Female)

Our standard panel lock strikes are designed to be used in panels where two 3/4" thick stiles are being locked together for a total thickness of 1-1/2". Should you be using a material that is a different thickness than the 1-1/2" total mentioned above, we have other strikes available that will allow for a total stile thickness of 1-9/16" to 1-13/16". Refer to “Panel Lock Strikes” on page #4 for the different sizes available. When using material that is undersized, as in two layers of plywood that equals 1-7/16" we recommend the use of spacer places. These plates are available on page #5.

Terms & Shipping

Terms

Net 30 days with approved credit. Visa, MasterCard, American Express and PayPal are accepted. COD shipments are available upon request. UPS charges a minimum \$10.00 fee for collecting COD payments and this fee will be added to the invoice.

Shipping

All shipments are FOB Display Innovations, St Paul Minnesota. All orders ship UPS Ground unless otherwise requested. Next Day Air, 2nd Day Air and Saturday delivery are available.

Pricing

All prices are subject to change without notice. Refer to online catalog or website for current pricing.

Panel Locks

Panel lock hook (Male)

Our panel lock hooks or “male” component. One set consists of one hook and one strike, see below for sets.

PART #	DESCRIPTION	MEASURE	PRICE
PLH	Panel lock hook (Male)	Each	\$ 8.90 ea
PLH-25	Panel lock hook (Male)	Bag of (25)	\$216.25 ea
PLH-50	Panel lock hook (Male)	Bag of (50)	\$432.50 ea

Panel lock strike 7/16” (Female) Our Standard

Our standard panel locks are designed to be used in panels where two 3/4” thick stiles are being locked together for a total thickness of 1-1/2”.

Note: When using plywood for stiles please verify the plywood thickness used. Plywood is sometimes undersized from the stated 3/4”. Spacer plates are recommended for use with undersized plywood. See following page.

PART #	DESCRIPTION	MEASURE	PRICE
PLS_4375	Panel lock strike 7/16” (Standard)	Each	\$ 1.95 ea
PLS_4375-25	Panel lock strike 7/16” (Standard)	Bag of (25)	\$45.00 ea
PLS_4375-50	Panel lock strike 7/16” (Standard)	Bag of (50)	\$90.00 ea

Panel Locks Sets

Our panel lock hooks and strikes are typically bagged with (25) or (50) units per bag. One set consists of one hook and one strike. One box set will consist of one bag of hooks and one bag of 7/16” strikes.

PART #	DESCRIPTION	MEASURE	PRICE
PL_Set-25	Panel lock hook & strike set	Box of (25)	\$261.25 ea
PL_Set-50	Panel lock hook & strike set	Box of (50)	\$522.50 ea

There are several quantity discounts for the boxes of (50) sets based on the following quantities:

(2) to (4) boxes = 5% discount	(5) to (9) boxes = 10% discount
(10) to (19) boxes = 15% discount	(20)+ boxes = 17% discount

Additional panel lock strikes

Should you be using a material that is a different thickness than the 1-1/2” total mentioned above, we have other strikes available that will allow for a total stile thickness of 1-9/16” to 1-13/16”. Listed below are the three sizes available, and the associated stile thickness.

PART #	DESCRIPTION	WORK THICKNESS	MEASURE	PRICE
PLS_500	Panel lock strike 1/2”	1-9/16”	Each	\$ 2.25 ea

PLS_750-25	Panel lock strike 3/4”	1-13/16”	Bag of (25)	\$55.00 ea

Panel Lock Accessories

Panel Lock Wrench—Standard

This is our standard panel lock wrench. 5/16" hex steel rod. These wrenches are used to rotate the cams in our panel locks for locking and unlocking.

PART #	DESCRIPTION	QUANTITY	PRICE
PLW-5x5-STD	Panel lock wrench 5" x 5"	Each	\$ 4.50 ea
PLW-5x5-STD-5	Panel lock wrench 5" x 5"	Bag of (5)	\$ 21.25 ea

Panel Lock Wrench—Extended

Similar to our standard panel lock wrench but with one leg extended to 12"

Note: The last batch of 5 x 12 wrenches came back from the metal shop with the long leg cut at 11"

PART #	DESCRIPTION	QUANTITY	PRICE
PLW-5x12-EXT	Panel lock wrench 5" x 12"	Each	\$ 5.50 ea

Panel Lock Spacers

These shims are used between the strike plate and the mounting surface. The shims compensate for materials that are less than a full 3/4" thick such as plywood. The spacer plates are used in pairs with each strike. Spacer plate consists of stamped steel. Saves shop labor fabricating your own shims and provides a consistent crush proof spacer. Sold in packs of (100).

PART #	DESCRIPTION	QUANTITY	PRICE
PL_Spacer-100	Spacer plates 7/16" to 3/8"	Bag of (100)	\$36.00 ea

Panel Lock Drilling Kit

This kit was designed to eliminate the problem of panel lock wrench access holes in panels that do not line up exactly with the wrench hole in the lock. This misalignment requires that larger than necessary wrench access holes be drilled through the panel. This misalignment can also create problems for the set-up crew. This kit eliminates the potential for misalignment and speeds up the installation process. For more information see page #18

Kit consists of two drill bits and a drilling sleeve. The kit is very easy to use and includes complete instructions.

PART #	DESCRIPTION	QUANTITY	PRICE
Drillkit	Panel lock drill kit	Each	\$44.00 ea

Hardware

Bolts: Carriage, Fully Threaded

1/4-20 Carriage Bolts, Fully Threaded, Steel with Zinc finish. Round head, square neck, manufactured to ASME B18.5 specifications, tensile strength: 60,000 psi. We stock 1/4-20 carriage bolts in seven lengths. We can order a large variety of different sizes and lengths in addition to the sizes in stock. Special order sizes are available in case quantities. Quantities vary per case depending on bolt size. Lead time for delivery on case quantities is typically two to four days.

PART #	DESCRIPTION	MEASURE	PRICE
CBolt250-20x1.5-100	1/4-20 x 1-1/2" Full thread	Bag of (100)	\$9.60 ea

CBolt250-20x6-300	1/4-20 x 6" Full thread	Case of (300)	\$41.00 ea

Bolts: Exhibit, Fully Threaded

1/4-20 Exhibit Bolts, Fully Threaded, Steel with Zinc finish. Flat head, square neck, manufactured to ASME B18.5 specifications. Exhibit bolts are like carriage bolts but with a 1" diameter flat heads which allows pressure to spread over a much larger area. Used on exhibit panels, crates, etc. We stock 1/4-20 carriage bolts in four lengths. We can order a large variety of different sizes and lengths in addition to the sizes in stock. Special order sizes are available in case quantities. Case quantities vary depending on size.

PART #	DESCRIPTION	MEASURE	PRICE
EBolt250-20x1.5-100	1/4-20 x 1-1/2" Full thread	Bag of (100)	\$25.50 ea

EBolt250-20x2.5-100	1/4-20 x 2-1/2" Full thread	Bag of (100)	\$34.50 ea
EBolt250-20x3-100	1/4-20 x 3" Full thread	Bag of (100)	\$39.20 ea

Torque Washers

Torque washers are made to be used with 1/4" carriage bolts. They serve two purposes, to increase the head diameter of the carriage bolt to 1", spreading the head load over a much larger area. Because the washers have a square center hole and prongs on the bottom side of the washer, they lock the carriage bolt in place and prevent it from turning during tightening or loosening of the nut. An excellent companion for the carriage bolt and washer base wing nut.

PART #	DESCRIPTION	MEASURE	PRICE
Torque_washer-100	Torque washer for 1/4" carriage bolts	Bag of (100)	\$12.25 ea
* (5) bags or more, price per bag:		Bag of (100)	\$11.64 ea

Machine Screws, Fully Threaded

1/4-20 machine screws, fully threaded, steel with zinc finish. Truss head, Phillips manufactured to ASME B18.6.3 specifications. We stock 1/4-20 machine screws in five lengths. We can order a large variety of different sizes and lengths in addition to the sizes in stock. Special order sizes are available in case quantities. Case quantities vary depending on size of machine screw. Typical delivery time of two to four days for special order cases.

As a result of manufacturers discontinuing production of some products, some items have been deleted from the catalog. We still have some of these products in stock but not listed in the catalog. Check the website at displayinnovations.com for a complete listing of all products available or give us a call and ask. We are also able to special order a large variety of items not listed. Have a need? Give us a call, we can probably get it for you.

Washer Base Wing Nuts

Speeds exhibit set-up and dismantle when using the "Nut & Bolt" method of assembly. These are a very popular item. Die cast, zinc alloy with 7/8" washer base. Eliminates the need for a separate washer and spreads the pressure of the nut over a broader area.

Note: Using Philips machine screws in combination with these wing nuts and using a cordless screw gun provides a very fast method of assembly and dismantle.

Hangers

Z-Clips & Z-Strips

PART #	DESCRIPTION	MEASURE	PRICE
Z-Clip_P2-20	Z-clips, 2" punched aluminum	Bag of (20)	\$ 11.25 ea
Z-Clip_P2-20	Z-clips, 2" punched aluminum	Bag of (100)	\$ 42.50 ea
Z-Strip_P72	Z-clips, 72" punched aluminum	Each	\$ 13.00 ea

These clips have been a very popular hanger for a very long time. These clips are used in a variety of mounting applications. The clips can be used in conjunction with the hanging strip or as sets. The strip can also be used as an alignment tool when mounting several clips in a line.

Crating Felt

This felt is well suited for crating and general packaging. We carry four widths, and two thicknesses, each with and without adhesive backing on 50 foot or 100 foot rolls, depending on the thickness. The 1/4" adhesive backed felt is especially well suited for crating as it offers extra cushion and does not require any mechanical fasteners. The color is white.

**** Note our lower sale price for felt!**

Electrical cords—Round Extension

Heavy duty, all rubber, three wire, grounded extension cords

Oil resistant, flexible to -34 degrees F, molded vinyl male and female plugs, black. Available in both SJ cords and SO cord. (SO cords have a heavier outside rubber coating and will withstand harder use. These SO cords are required by some exhibit halls where cords could be subjected to abuse.)

Electrical cords—Flat Extension

Heavy Duty SPT-3 flat extension cords, black with molded plugs

SPT-3 12/3 & 14/3 3-Conductor 125 volt / 15 AMP, Low Profile Extension cord, Black.

These cords are especially well suited for use in exhibits for under carpet installation. The flat cord can be taped to the show hall floor prior to installation of pad and carpet. The low profile cords eliminates the need to cut (channel) pad as required for the thicker round cords. SPT-3 low profile extension cords are designed for indoor/outdoor use in convention centers, exhibition halls & hotels and trade show booths and displays. Heavy duty flexible jacket guarantees this cord has fantastic flexibility while being resistant to grease and grime. Ends are molded-on standard 3-prong u/ground type. They are heavy duty, water resistant and come with super tough strain reliefs to insure the cord will not pull away from the ends.

12/3 SPT-3 with ground, Black vinyl cord, black ends

Extension Cord Accessories—Cord-Lox

Cord-Lox are Velcro straps that are designed to attach to the ends of cords and cables using the rivet provided. Once attached they create a strap that quickly wraps around coiled cords to secure the coils. The smooth exterior surface allows printing company name or other information to help identify and protect the cords and cables. Currently available in three colors and three lengths.

9" strap will fit 15' cords, 12" straps will fit 25' cords, 15' straps will fit 50' & 100' cords
Felt tip markers work well for writing on the exterior of the straps for labeling

Instructions for using the Display Innovations Wrench Access Hole Drilling Kit

- 1: Install the panel locks in the panel stile in the usual way.
- 2: Cover one face of the panel frame with plywood or other material.
- 3: Add the finish surface to the plywood or other material.
- 4: Insert 5/16" X 10" pipe into wrench opening of the lock from the uncovered side of the panel until it hits the back side of the plywood panel surface.

- 5: Insert the 7/64" X 12" drill bit through the center of the pipe and drill through the plywood and finished surface.
- 6: Remove the pipe from the lock wrench opening.
- 7: Using the 3/8" brad point bit, drill the 7/64" hole out to 3/8" from the face of the panel.
- 8: If you are building double sided panels, and want a wrench access hole in both faces of the panel, add the plywood or other material, plus the finish material to the second side of the panel and repeat steps 4, 5, 6 and 7.

This drilling system will work on any panel thickness up to 10".

This drilling method should give a perfect hole location every time, and in perfect alignment with the wrench hole in the lock.

Panel Lock Installation Instructions

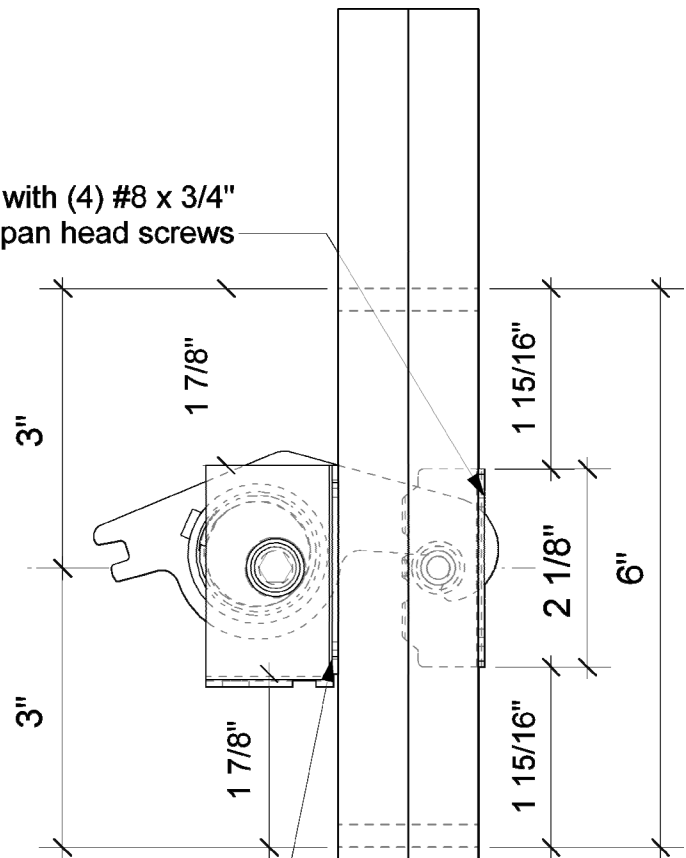

1. Route a 1/2" x 6" slot in both pieces to be joined.
 2. Mount lock and strike in the center of the slot using #8 x 3/4" pan head screws similar to drawing. Align the center of the cam hole and the strike pin.
 3. Cover panels (skin) as desired. *For double-sided panels drill the cam wrench access hole before applying 2nd skin.
- * These panel locks and strikes must be installed before the panel is sealed. They install on the inside of the panel and can NOT be installed from the outside.

Note: We have a drilling kit available that gives perfectly aligned wrench access holes in double-sided panels. See previous page and page #5 for details.
